EXPERIENCE

Independent Software Engineer May 2026 – Present
Nuclear Gaming *Montreal, Canada*

- Owned end-to-end engineering across TypeScript/Phaser game clients, Rust/WASM simulation engines, deterministic event-replay systems, and UI/UX implementation.
- Wrote 200+ Vitest tests and GitHub Actions pipelines that test, build and verify every push to main.

Full-Stack Developer Nov 2025 – May 2026
Vretta *Montreal, Canada (Remote)*

- Built grader-facing features in Angular, Node.js and TypeScript on a 3-person team, including exam scoring flows and question escalation to admins, on an education assessment platform used by 1M+ students.
- Supported clients on live calls to debug production issues, tracing each through SQL and AWS CloudWatch logs.

Software Engineering Intern May 2025 – Aug 2025
Alphinat *Montreal, Canada*

- Cut translation turnaround from 1 month to 3 days by writing a Python and pandas tool that automated the multilingual content pipeline, replacing thousands of manual text edits.
- Owned end-to-end delivery of a production web app for the Hague Conference on Private International Law (HCCH), redesigning the user flows and building the full frontend.

Founder Jan 2025 – Apr 2025
Planorama *Montreal, Canada (Remote)*

- Built a full-stack project-planning platform in Next.js 15, React 19, TypeScript, PostgreSQL and Prisma, with real-time multi-user diagram editing (Yjs, React Flow) and Google/GitHub sign-in.
- Built an AI chatbot that turns prompts into editable project diagrams using Gemini structured JSON output, validated with Zod and metered by per-user credits sold through Stripe.

Full-Stack Engineering Intern May 2024 – Aug 2024
Avocado *Montreal, Canada (Remote)*

- Delivered 90% of the platform's core marketplace end to end: product listings, image uploads and date-based rental availability, in Next.js, Prisma, MongoDB and Google Cloud.

EDUCATION

Bachelor of Science, Computer Science, GPA 3.7 Aug 2022 – May 2025
McGill University *Montreal, Canada*

Exchange, Computer Science Jan 2024 – Jun 2024
University of Edinburgh *Edinburgh, United Kingdom*

Exchange, Computer Science Sep 2024 – Dec 2024
King's College London *London, United Kingdom*

AWARDS

- Placed 2nd of 600+ developers at McHacks 12 as the only solo finalist, building the first version alone in 24 hours.

PROJECTS

HoloQuiz – AI study device for medical students, University of Edinburgh research project Jan 2024 – Apr 2024

- Wrote all the software in a 6-person multidisciplinary team: Raspberry Pi button and touchscreen handling, and a Python pipeline that generates quiz questions on a chosen topic with GPT as structured JSON and grades answers live.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Java
Web & Data	React, Angular, Node.js, REST APIs, PostgreSQL, MongoDB, pandas
Engineering	Git, Docker, GitHub Actions (CI/CD), Unit testing, Code review, Object-oriented programming, AWS CloudWatch, LLMs
